

Infrared Curing Lamp Baseline

AH 6-2 6000W Short Wave

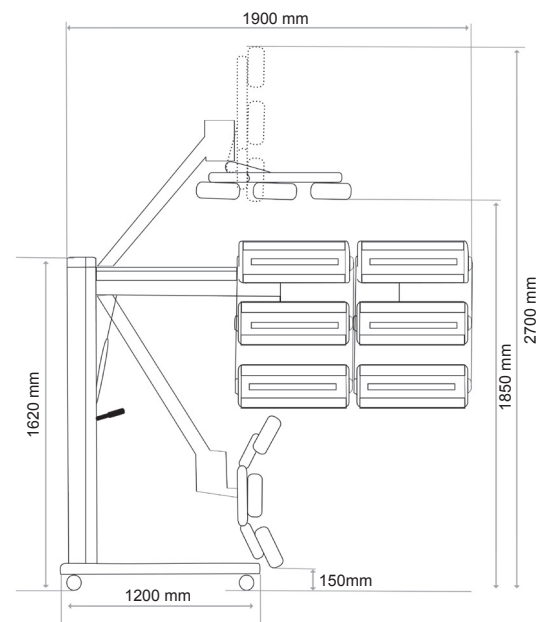

Features:

- 6 cassettes equipped with a short wave infrared halogen lamp (each 1000 W) .
- For curing high areas like car tops, the cassettes can be adjusted up to a height of 2700 mm.
- The solid frame is made of steel (base) and aluminum alloy (column).
- The smooth-running wheels could be moved in all directions which provides highest flexibility. The wheels can be fixed by a locking-brake.
- The hydraulic lifter is equipped with an adjustable bracket which ensures 360° rotation of the cassettes.
- The cassettes can be controlled independently.
- Easy and user-friendly handling with a digital operation panel.
- This curing lamp is equipped with distance control in order to avoid overheating of the to be cured surface.
- The temperature can exactly be adjusted from 40°C to 100°C.
- Continuous and pulsating curing function.
- This curing lamp is ideal for curing small and medium areas (max. 1800 mm x 1000 mm)
- 5 m cable.

Technical Specifications:

Input Voltage:	380 V / 3PH / 50-60 Hz
Input Power:	6x 1000 W (total 6000 W)
Quantity of Cassettes:	6
Time Setting:	0 min. – 99 min.
Temperature:	40°C – 100°C
Curing Area:	max. 1800 mm x 1000 mm
Weight:	67 kg
Distance Control:	available
Temperature Control:	not available
Material Frame:	steel (base), aluminium alloy (column)
Material Cassettes:	steel
Spare Part (lamp):	1100 W, 52,5 cm, 230 V (11ALLZ709)
Dimensions:	
Frame:	width:825 mm, length:1200 mm, height:1620 mm
Cassettes:	width: 570 mm, height: 210 mm
